Push buttons permit the operator to advance and retract at will. The operator is never committed to a full cycle, and can always back off at any time during the advance even under pressure. This feature increases efficiency because cuts and crimps can be adjusted as necessary, simply by stopping the advance or retract mode.</p> <p>The electric motor shuts off when up button is released and the pressure reaches to preset value of 68.5 Mpa. The ram can be retracted while DOWN button is depressed.</p> <p>A 3 meter remote control cable provides both safety and convenience. The operator can set up an operation and then move away from the work site before engaging the tool.</p>	<ul style="list-style-type: none"> Two stage pumping system for rapid advance.
